Inverse threshold–response function with point–wise 95% confidence intervals
Assumes monotonicity of true function
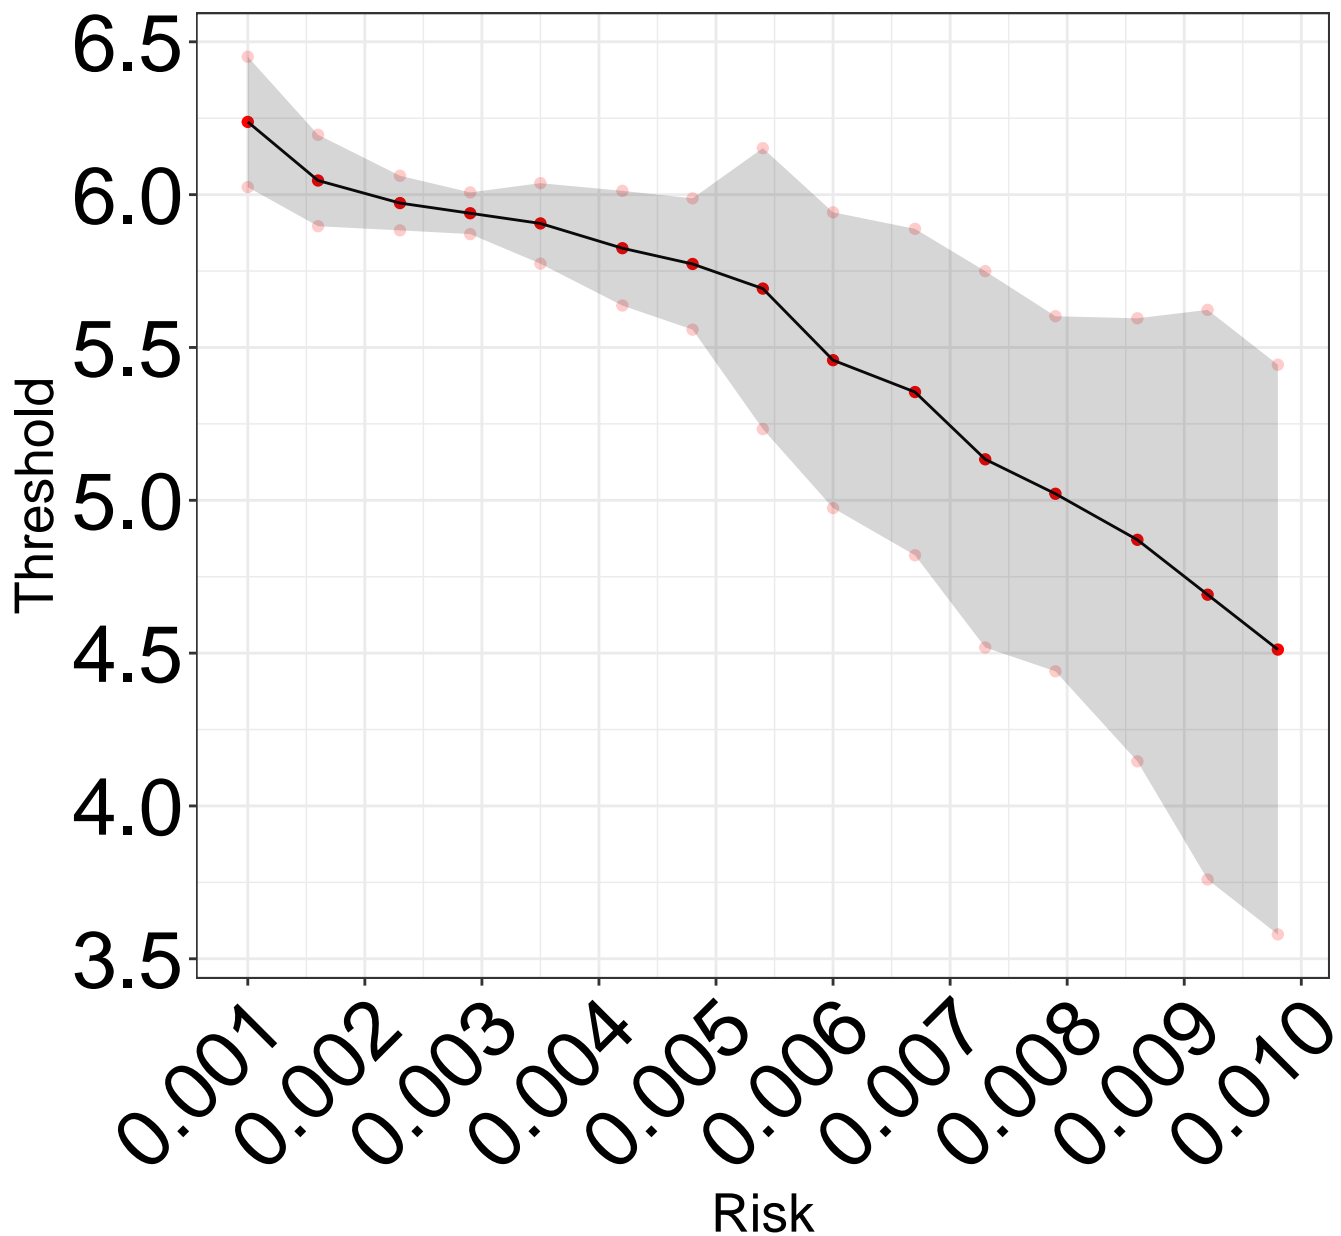

Inverse threshold−response function with point−wise 95% confidence interval
Assumes monotonicity of true function

Inverse threshold–response function with simultaneous 95% confidence bands

Assumes monotonicity of true function

Inverse threshold−response function with simultaneous 95% confidence band

Assumes monotonicity of true function

Inverse threshold–response function with point-wise 95% confidence intervals
Assumes monotonicity of true function

Inverse threshold–response function with point-wise 95% confidence intervals
Assumes monotonicity of true function

Inverse threshold–response function with simultaneous 95% confidence bands
Assumes monotonicity of true function

Inverse threshold–response function with simultaneous 95% confidence bands
Assumes monotonicity of true function

Inverse threshold–response function with point–wise 95% confidence intervals
Assumes monotonicity of true function

Inverse threshold−response function with point−wise 95% confidence intervals
Assumes monotonicity of true function

Inverse threshold–response function with simultaneous 95% confidence bands
Assumes monotonicity of true function

Inverse threshold−response function with simultaneous 95% confidence bands
Assumes monotonicity of true function

Inverse threshold–response function with point-wise 95% confidence intervals
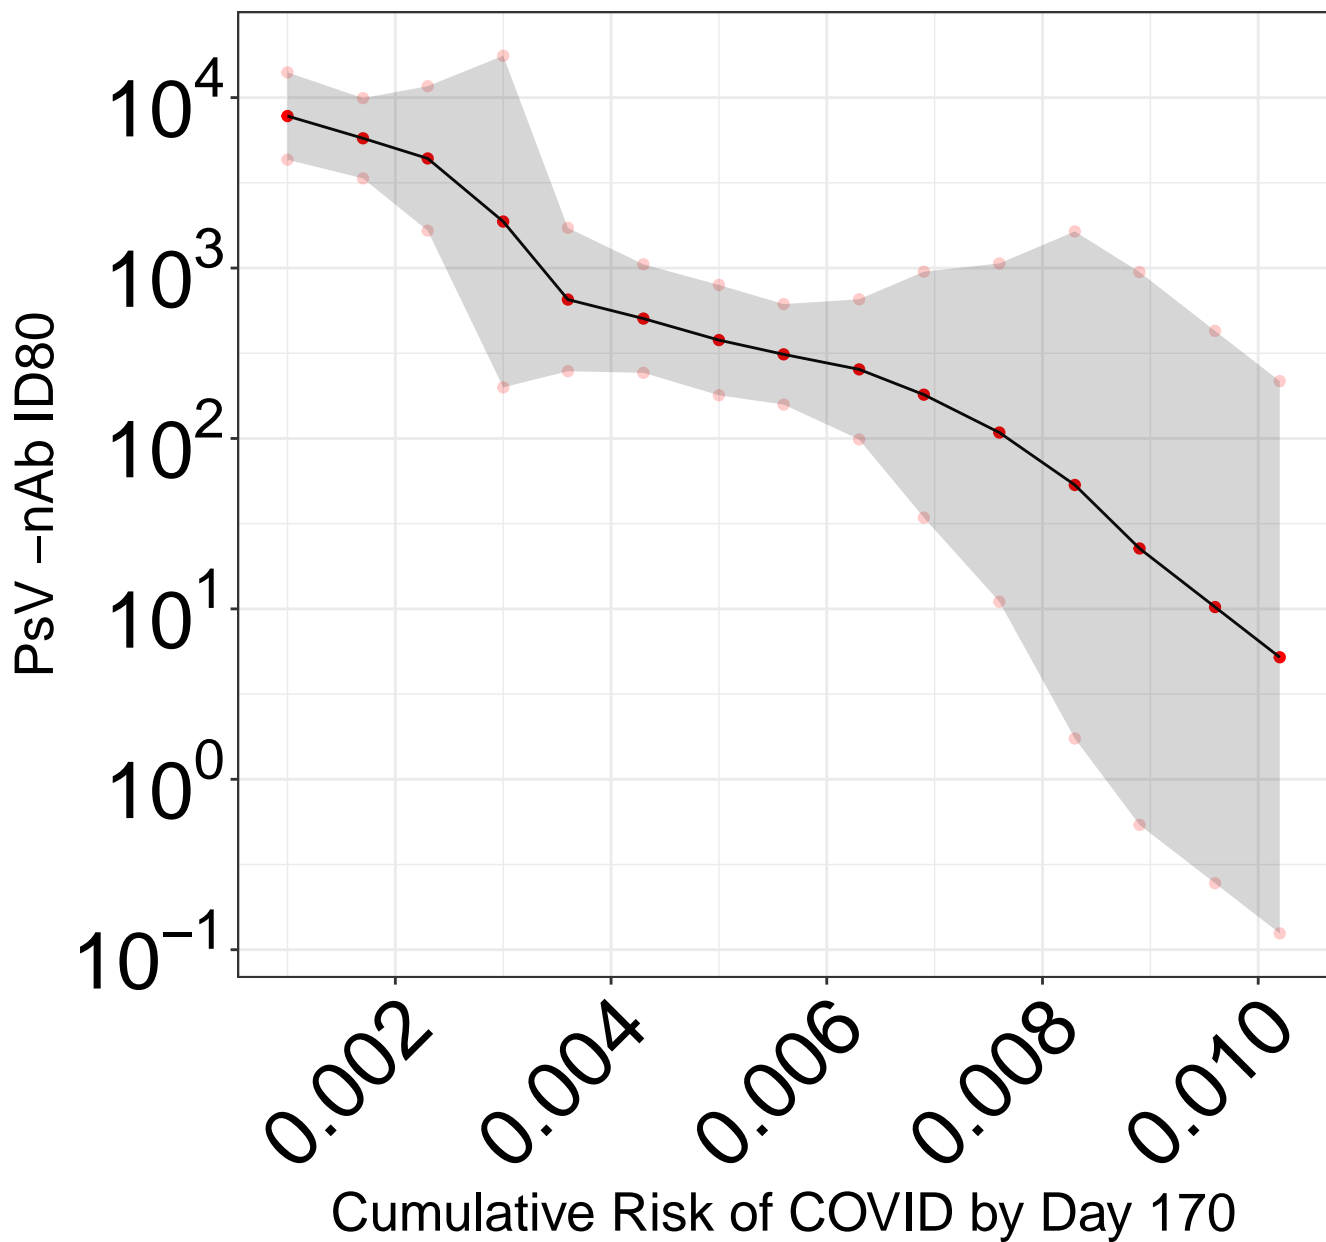

Assumes monotonicity of true function

Inverse threshold–response function with point-wise 95% confidence intervals
Assumes monotonicity of true function

Inverse threshold–response function with simultaneous 95% confidence bands
Assumes monotonicity of true function

Inverse threshold–response function with simultaneous 95% confidence ba

Assumes monotonicity of true function

Inverse threshold–response function with point–wise 95% confidence intervals
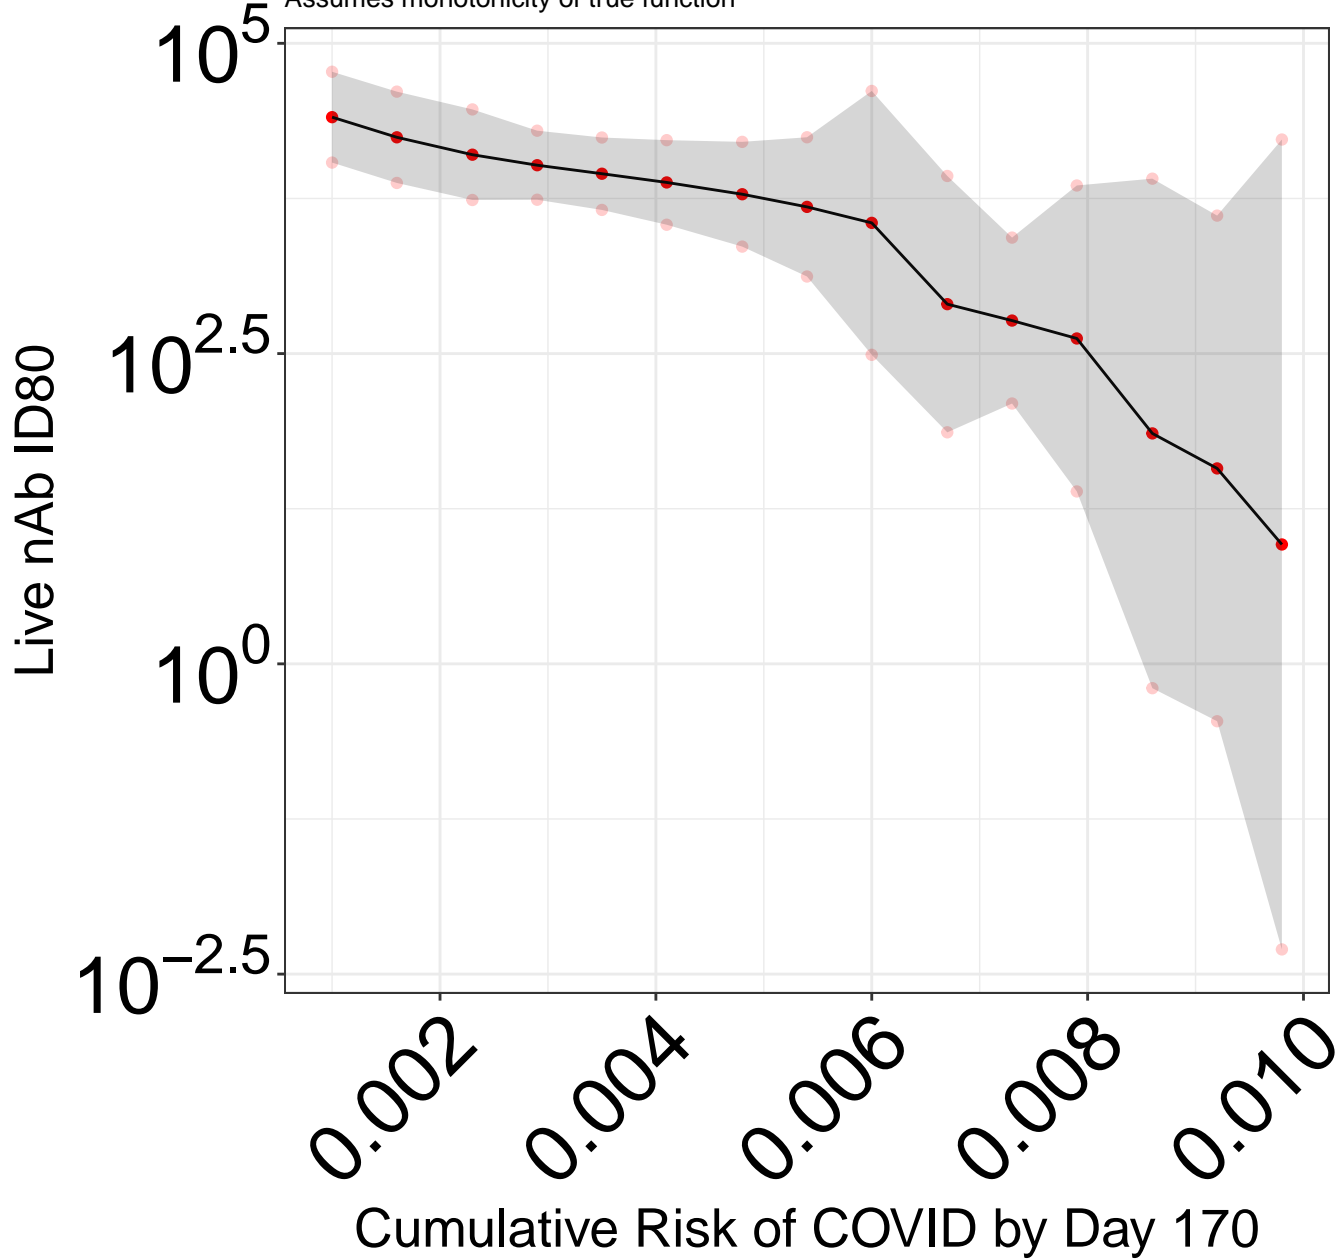

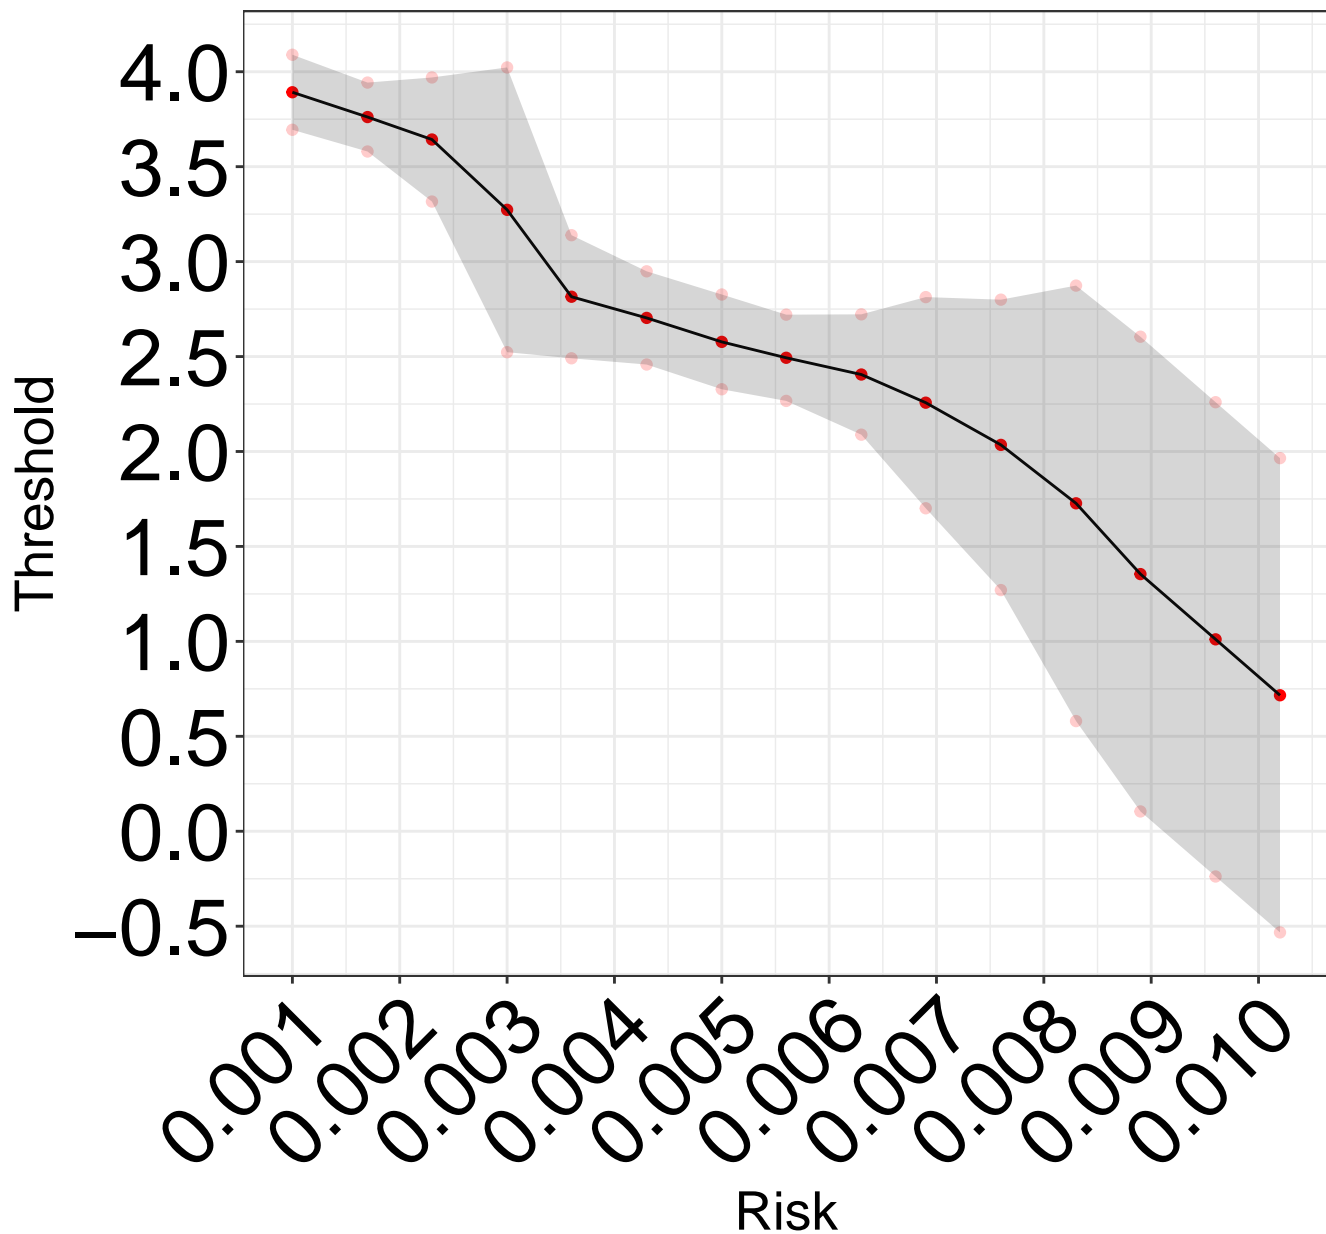

Assumes monotonicity of true function

Inverse threshold−response function with point−wise 95% confidence intervals
Assumes monotonicity of true function

Inverse threshold–response function with simultaneous 95% confidence bands
Assumes monotonicity of true function

Inverse threshold–response function with simultaneous 95% confidence bands
Assumes monotonicity of true function

Inverse threshold–response function with point-wise 95% confidence intervals
Assumes monotonicity of true function

Inverse threshold–response function with point-wise 95% confidence intervals
Assumes monotonicity of true function

Inverse threshold–response function with simultaneous 95% confidence bands
Assumes monotonicity of true function

Inverse threshold–response function with simultaneous 95% confidence ba
Assumes monotonicity of true function

Inverse threshold–response function with point–wise 95% confidence intervals
Assumes monotonicity of true function

Inverse threshold–response function with point–wise 95% confidence intervals
Assumes monotonicity of true function

Inverse threshold−response function with simultaneous 95% confidence bands
Assumes monotonicity of true function

Inverse threshold–response function with simultaneous 95% confidence bands
Assumes monotonicity of true function

Inverse threshold–response function with point–wise 95% confidence intervals
Assumes monotonicity of true function

Inverse threshold−response function with point−wise 95% confidence intervals
Assumes monotonicity of true function

Inverse threshold–response function with simultaneous 95% confidence bands
Assumes monotonicity of true function

Inverse threshold–response function with simultaneous 95% confidence band
Assumes monotonicity of true function
