# Shared Data Cleaning Verification Documentation

March 17, 2021

## Overview

This document indicates the script, author, verification script, and verification author of the files contained within the parent folder. To verify the images generated, the two scripts use the same base mock data. Then the input data used to generate the plots was recreated, and compared to ensure they are the same. Any statistics shown in the final plots were recreated manually and verified.

### Signatures

| Role | Name | Signature | Date |
|------|------|-----------|------|
| Manager | Dr. Peter Gilbert | | |
| Specifier/Programmer | Dr. Youyi Fong | | |
| Programmer | Dr. David Benkeser | | |
| Programmer | Nima Hejazi | | |
| Tester | Ellis Hughes | | |

### Original Scripts

The scripts used to generate the original outputs. These live within the `data_clean/` folder.

---

- Script: make_data_proc.R
- Author(s): Youyi Fong, Nima Hejazi, David Benkeser
- Last Edit Date: March 8, 2021
- Description:

### Verification Scripts

The scripts used to verify the outputs of the original outputs. These live within the `data_clean/verification` folder.
